

New Lecture
Saturday, October 18th
10:00am to 11:00am

“The Mystery of the Romanov Family Fate Explained.”

How was this mystery solved through the use of modern DNA technology?

Dr. Zoran M. Budimlija, MD, PhD, a forensic pathologist and DNA expert, will give a slide lecture on how “Historical Mysteries Are Solved Through DNA.” He will explain in everyday terms how experts use modern technology and DNA to answer the riddles of historical events.

How was DNA used to establish the identities of Czar Nicholas and The Romanov Family Members? Who was found? Who was missing? What are the New Discoveries?

Anastasia or Maria?

The Mystery and Lure of their fate. What happened with Czarevich Alexei?

How was the Royal Windsor Family connected to the Identification of the Romanov Family?

These Questions and more will be answered during this informative lecture!
Dr. Budimlija will be available for questions after the lecture.
